

Business Analyst

Job Detail

Company: TECHVED CONSULTING

Website: <http://www.techved.com/>

Location: Remote

Position: Business Analyst

Job Profile:

The role will be responsible for working alongside other functional users. The work involves performing detailed requirements analysis from all departments, documenting processes, user stories and performing some user acceptance testing. In addition, this position is responsible for explaining difficult IT/ technical concepts to non-technical users.

As a Business Analyst you will work across the project lifecycle in the following areas:

- Information gathering: Work with customers to understand their business models and goals and help define strategy, content, and features for design of their web site.
- Developing Information Architecture Documentation (site maps, user journeys, navigation models and wireframes, mockups and working prototypes) that serves as a blueprint for both websites and applications upon which other aspects are built.
- You will be acting as the link between the business and Design and Technology team

Key Responsibilities-

- Evaluating business processes, anticipating requirements, uncovering areas for improvement, and developing and implementing solutions.
- Leading ongoing reviews of business processes and developing optimization strategies.
- Conducting meetings and presentations to share ideas and findings.
- Performing requirements analysis.
- Documenting user stories. Updating, implementing, and maintaining/documenting procedures.
- Effectively communicating your insights and plans to cross-functional team members and management.
- Gathering critical information from meetings with various stakeholders and producing useful reports.
- Working closely with users, functional team, technical team, and managers.
- Ensuring solutions meet business needs and requirements.
- Performing user acceptance testing.
- Managing projects, developing project plans, and monitoring performance.
- Prioritizing initiatives based on business needs and requirements.

Educational Requirements:

- Graduation / Post Graduation in any stream
- Business Analyst training or certification is preferred
- 3+ years of experience

Professional and Personal Skills:

- Understand and identify the business issues / requirements and create a detailed Functional Requirement Document/Gap document.
- Develop a prototype / framework that meet requirements and address the business issue.
- Work with the technical team on the requirements, address and resolve all doubts/queries of the developer / tester. As and when required, check with clients and seek clarity.
- Participate and contribute in review meetings.
- Strong knowledge of user interface design processes and methodology.
- Strong analytical, problem solving and troubleshooting skills coupled with strong communication skills
- Detail-oriented and Comfortable in a fast-pace environment.
- Ability to work on multiple projects, track and report status as an individual contributor
